CONTOUR ThreadLift

Dr. David Sneed has now performed over 150 Contour ThreadLifts™, the new Surgery-Free Facelift.

The Contour ThreadLift™ procedure is a non-surgical, no-scar facelift performed using tiny surgical sutures or threads (called prolene sutures) to lift and support the droopy elements of the brow, cheek, face and neck. Threads have microscopic barbs on each end that will grasp onto and lift the droopy soft tissue. The threads are inserted under the skin in precise locations using a small hollow needle. The threads used during this process stay within the deep fat and subcutaneous tissue forever and can help prevent further sagging as well as lift current drooping.

The effects of Contour ThreadLift™ are immediate. You may experience from one week to one month of swelling and bruising, but there is essentially very little down-time. The lift effect can achieve 50-60% of a traditional face lift procedure. At the time of your treatment, we can also combine this with additional skin rejuvenation therapies such as Botox® or Restylane™. The results from the Contour ThreadLift™ last 3-5 years. However, because the threads do not dissolve, the process continues to prevent droopiness for many years. After healing, the threads cannot be felt or seen. According to our supplier of threads, Dr. David Sneed performs more Contour ThreadLifts™ than any other physician in the Austin area.

Cosmetic Synergy - PhotoFacial™, Cool Touch III™, Chemical Peels, & Cosmeceutical Solutions

Taking off or reducing brown spots, wrinkles and red color from your skin has never been easier - and with no down time! Imagine losing all the freckles and liver spots built up from years of sun exposure while easing those lines and wrinkles at the same time. And, what of skin that just won't let go of the red color and spots. These things are now treatable with the real PhotoFacial™. Dr. Sneed was personally trained to perform PhotoFacial™ by Dr. Patrick Bitter, Sr., the creator and original researcher of this powerful technique.

Cool Touch III™ laser is a no down-time skin laser that can re-build your skin from the inside out. It stimulates the cells that produce collagen to produce new, youthful infrastructure in greater quantities. It is a natural, healthy, and long-lasting way to rid yourself of lines and wrinkles, without ever missing a day of work or other activities. Both treatments may be used on any area of the body. Cool Touch III™ also helps reduce pore size for up to three years.

To enhance your results and tighten skin, a chemical peel can be added to your combination of rejuvenating treatments. We offer everything from simple glycolics to more powerful TCA peels. Finally, let us send you home with a sensible home care regimen PROVEN to make a difference.
